RESOUNDIFY

OmniPanel3

VC and SS with LCD Screen and Rotary Knob – Aurispro Series

PRODUCT OVERVIEW

The **Resoundify OmniPanel3** is a modern, user-centric control interface designed for conference rooms, boardrooms, and AV-integrated environments. It combines Volume Control (VC) and Source Selector (SS) control into a single intuitive wall-mounted unit, offering real-time interaction and effortless operation.

The OmniPanel3 is a premium-grade, multi-function wall control panel designed for seamless integration with professional Volume Control (VC) and Source Selector (SS). Tailored for high-end meeting environments, the OmniPanel3 provides a highly intuitive, ergonomic, and interactive control solution that simplifies room technology for everyday users.

KEY FEATURES

- **High-Resolution Multi-Touch Display:** The OmniPanel3 features a high-quality LCD screen with clear visual feedback and customizable UI layouts. It delivers a smooth and intuitive interface for real-time control of video conferencing systems, audio levels, input sources, and presets — all in one sleek panel.
- **Seamless Ethernet Connectivity:** Equipped with a Gigabit Ethernet port and Power over Ethernet (PoE), the panel ensures fast data transmission, simplified wiring, and flexible installation across networked environments.
- **Modern Mechanical Design:** Its slim, wall-mountable form factor and optional mounting accessories allow for seamless integration into a variety of architectural settings.
- **Secure & Maintainable Platform:** Advanced encryption protocols and remote firmware update capabilities ensure long-term reliability, security, and ease of maintenance.

APPLICATIONS

- Boardrooms
- Classrooms
- Auditorium
